# HWA1004V3C-SP

■ High-efficiency Switching Power Supply product

**HWA1004V3C-SP is a High-efficiency power supply with a rated output of 4.3V / 100 A, designed for LED display products. The power supply has the following characteristics:**

- ◆ Small size: 246mm\*46mm\*26.3mm(L\*W\*H)
- ◆ Light weight :≤500g
- ◆ High efficiency: 91%(@Input 220VAC,Output4.3V/100A)
- ◆ Output voltage 4.3V
- ◆ Small Leakage current: <1mA
- ◆ EMI standard: EN55032 CLASS B
- ◆ Wide operating temp. range: -40~+70℃(+50℃~+70℃ linear de-rating, referring to fig. 1)
- ◆ CInput nominal voltage range: 90VAC~240VAC, limit voltage: 80VAC~264VAC (reference derated curve (Figure 2))
- ◆ Power factor: ≥0.95
- ◆ Cooling mode: conduction cooling
- ◆ Output over-voltage protection
- ◆ Output over-current protection
- ◆ Output short-circuit protection
- ◆ Over temperature protection
- ◆ Compliance with UL, CE ,CCCcertifications

## Product Picture

### NOTES:

1. The final installation environment of the product needs to meet the environment where the heat sink is simulated. (Refer to fig. 4 for the aluminum radiator size.)
2. The indicators in this specification are the results of testing under the recommended environment. That is, the power supply must be installed on a heat sink with the size of 450\*450\*4mm.

### safety rule

|                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <p>High voltage</p> | <p>Power input port with high voltage, cannot be touched by hand ( Port d'entrée d'alimentation à haute tension, ne peut pas être touché à la main)</p>                                                                                                                                                                                                                                                      |
|  <p>Warning</p>      | <p>The power supply is a product with large leakage current. Please ground reliably before powering on. When install the product, the metal enclosure needs to be reliably earthed, and the earthing connection is to be evaluated in the end installation.<br/>(L'alimentation est un produit avec un fort courant de fuite. Veuillez mettre à la terre de manière fiable avant de mettre sous tension)</p> |
|  <p>High voltage</p> | <p>It is strictly forbidden to carry out high voltage and alternating current operation under thunderstorms (Il est strictement interdit d'effectuer des opérations à haute tension et à courant alternatif sous des orages)</p>                                                                                                                                                                             |

( figure 1 )

#### 2) Input voltage - load de-rating curve

( figure 2 )

## Efficiency Curve

## 4) Installation requirement

In order to meet the requirement of the de-rating curves and the performance of the whole machine, the actual installation requires that the bottom of the chassis be tightly close to the heat-dissipating aluminum plate or to the case of the system of the same size (the recommended size of the heat-dissipating plate is shown in Figure 4, the unit is mm). In order to optimize heat dissipation, the surface of the aluminum plate must be smooth and coated with thermal grease, and the power supply must be installed on the center of the aluminum plate.

| Output - Chassis      | 500Vdc/10mA//1min                                                                                                                                                                          |                           |
| Leakage Current       | $< 1\text{ mA}$                                                                                                                                                                            | 240Vac/50Hz Input         |
| Grounding Resistance  | $< 0.1\ \Omega$                                                                                                                                                                            | Test condition: 40A/2mins |
| Insulation Resistance | @ Normal atmospheric pressure, relative humidity: 90% Testing voltage: 500V dc Insulation of primary-secondary, primary-ground, secondary-ground shall not be less than $10\text{M}\Omega$ |                           |

## 2. Mechanical

| Mechanical specifications |          |
|---------------------------|----------|
| Length (mm)               | 246 ±0.5 |
| Width (mm)                | 46±0.5   |
| Height (mm)               | 26.3±0.7 |
| Weight (g)                | ≤500     |

### Dimensions and mounting holes - terminal coordinates

### Definition and Installation Notes for Input Terminal and Output Terminal

| Name            | Function | Maximum Torque | Wiring Diameter                   |
|-----------------|----------|----------------|-----------------------------------|
| Input Terminal  | L        | 6.5kgf.cm      | 18AWG min.                        |
|                 | N        |                |                                   |
|                 | ⏏        |                |                                   |
| Output Terminal | GND      | N/A            | According to the actual situation |
|                 | GND      |                |                                   |
|                 | +V       |                |                                   |
|                 | +V       |                |                                   |
